

The Middlebridge Scimitar GTE

- This car is one of only 77 cars ever built.
- Middlebridge cars were built to order and spec' in Beeston, Nottingham.
- Middlebridge Scimitars use G.R.P. bodies and a separate galvanised chassis from new. (No welding or rot problems here.)
- HRH Princess Anne still owns and runs Middlebridge No.5 and these were the cars that were responsible for her legendary speeding tickets!!
- These cars were designed to be long distance, high speed tourers and are still more than capable of holding their own today.
- After ordering, you could visit the factory to see your car during build progress which included your paint colour, interior, wood, wilton, leather, air con' ..etc etc...
- The original SE5 Scimitar was the first sports estate car ever produced and it had many totally unique new features including the first ever folding split rear seats, rear wash/wipe system and the first ever rear tail-gate gas struts, all which are now common place!!!
