VALUES RISING

Middlebridge only managed to make 77 genuine Nottingham-built Scimitars, despite the firm upgrading the previous Reliant Scimitar's specification and moving to a fuel-injected 2.9 Scorpio V6. Rarity helps these on value, and prices have recently been approaching £10,000 for excellent examples of this most usable Scim. Find a good one at a reasonable price and you've either got a great, fairly rustproof winter classic, or a sound investment for the future.

Sharp investment: Nottingham-built Scimitars are increasing in value apace
